

miniMULTI

installation controller for
simple mixing systems
and hybrid installations

Why choose the miniMULTI controller?

sell pump groups with integrated installation controllers; choose electronics that enhance your solution and keep you one step ahead of the competition

optimize your system's performance and reduce costs with effective climate control

offer installers a simple way to connect devices using the installation assistant

connect miniMULTI to evoSYSTEM and control the installation with full functionality via Bluetooth on your phone

take full control of your installation and effectively reduce rising bills

miniMULTI features

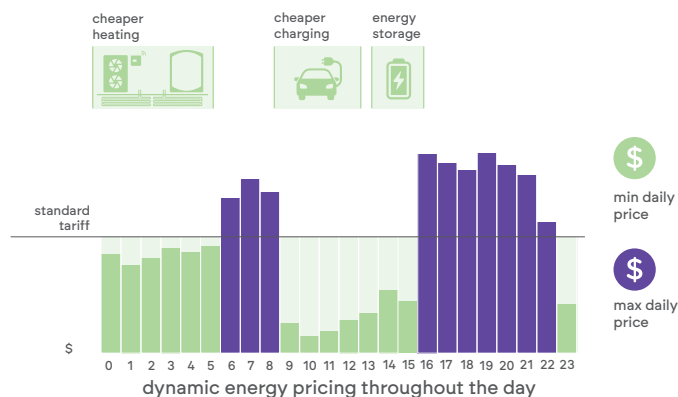

- installation Assistant
- support for up to 2 heating circuits
- domestic hot water (DHW) management
- weather-based control
- easy remote software updates
- simple operation
- option to connect to an online system
- possibility to add a control panel

evoSYSTEM

optimize energy consumption

connect miniMULTI to the evoSYSTEM

- dynamic tariffs and real-time price analysis
- thermal energy storage and usage during peak hours
- increased self-consumption of PV energy in a net-billing system and heat storage
- charging electric vehicles when energy is at its cheapest

smart energy management with evoSYNC
